

INDEX SEMINUM 2019

Teplice 2020

BOTANICAL GARDEN TEPLICE

The Botanical Garden Teplice was established by the Teplice City Council in 2002 as an independent public body and is fully funded by the Teplice City Council. From the Garden's total area of two hectares almost a half is dedicated to the open-air display of plants. The exhibition glasshouses cover 2400 m² of land and the storage glasshouses, which are not open to the public, cover 1750 m². Each one of our three glasshouses is dedicated to a distinct climatic zone.

THE XERIX GLASSHOUSE

Contains flora of the arid regions, of the semi-deserts of Central and South Africa, southern Africa, Madagascar and Arabia and also the small, but very captivating, exhibits of the flora of the Galapagos Islands and the Yemeni island Soqotra. A notable piece of art here is Mexican pueblo.

THE TROPICAL GLASSHOUSE

This is the most spacious. It covers an area of over 1000 square meters and stands almost 16 meters high. A lively waterfall, two flowing brooks, a copy of the ruins of a Mexican pyramid, a glazed case with orchids and other rare plants, a pond and aquariums enhance the interior. All plants exhibits are displayed – as in other glasshouses – by their geographical origin and include collections from tropical America, Asia, Australia, Africa and northern Madagascar. Another interesting feature is the „crossworder's flower-bed“ which is arranged with plants whose names are well known from crosswords but are less well known visually, such as coca, cola, abaca, balsa, anona....

THE SUBTROPICAL GLASSHOUSE

Contains Andean flora from Mexico to Patagonia, the Himalayas, also southern Australia and New Zealand, and finally east of South Africa – all having wet winter. The new exposition of flora from Chilean temperate forest is quite original. Particular to Teplice is a landscaped segment depicting the region 20 million years ago when the local brown coalfields were formed. Although the earlier species have not survived, they are reflected in the same genera.

THE OPEN-AIR DISPLAY

Covers almost one hectare of land. Trees and shrubs, the woodland undergrowth of geographically differentiated plants, form its boundaries. The central lawn is decorated with a large rockery, several basalt columns and a group of hibiscus. During the summer the circular bed blooms with hundreds of perennials and annuals. Altogether some 2500 species and cultivars can be found in the Garden's open land. Visitors are very welcome to take a rest under the pergola or to take a seat in our candy store.

MEAN MONTHLY TEMPERATURE (°C)

I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	XI.	XII.
-1.3	0.5	4.1	8.9	13.9	17.0	18.6	18.0	13.9	8.8	3.6	0.3

MEAN ANNUAL TEMPERATURE : 8.9 °C

EXTREME HIGHEST TEMPERATURE: +35.9 °C (29.VII.1983)

EXTREME LOWEST TEMPERATURE: -21.7 °C (14.I.1987)

MEAN MONTHLY RAINFALL (mm)

I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	XI.	XII.
33.6	29.8	35.0	33.7	50.1	64.0	58.0	60.0	40.9	32.9	38.0	40.4

MEAN ANNUAL PRECIPITATION: 516.4 mm

Altitude 228 m above sea-level

Coordinates of garden: N 50° 38' 17'' , E 13° 50' 32''

Nomenclature of plants is mainly based on:

www.theplantlist.org

<http://apps.rhs.org.uk/horticulturaldatabase/HortGenera.asp>

Abbreviations: O – plant is cultivated outdoors
G – plant is cultivated in glasshouses

In response to the Convention on Biodiversity (Rio de Janeiro, 1992) the Teplice Botanical Garden informs its correspondents that seeds from this catalogue are available on an exchange basis, exclusively for institutions working in the areas of education, research or conservation. Any material obtained from these seeds may not be used to generate commercial profit.

Please, limit your request to 20 items, deadline is 31st May 2020

Order by e-mail is preferred (beranek@botanickateplice.cz) but you can order by post too, of course. Thank you

Teplice 2020

Agreement on the supply of living plant material for non-commercial purposes leaving the International Plant Exchange Network

Against the background of the provisions and decisions of the Convention on Biological Diversity of 1992 (CBD) and in particular those on access to genetic resources and benefit-sharing, the garden is dedicated to promoting the conservation, sustainable use, and research of biological diversity. The garden therefore expects its partners in acquiring, maintaining, and transferring plant material to always act in accordance with the CBD and the Convention on the International Trade in Endangered Species (CITES).

The responsibility for legal handling of the plant material passes on to the recipient upon receipt of the material. The requested plant material will be supplied to the recipient only on the following conditions:

1. Based on this agreement, the plant material is supplied only for non-commercial use such as scientific study and educational purposes as well as environmental protection. Should the recipient at a later date intend a commercial use or a transfer for commercial use, the country of origin's prior informed consent (PIC) must be obtained in writing before the material is used or transferred. The recipient is responsible for ensuring an equitable sharing of benefits.
2. On receiving the plant material, the recipient endeavours to document the received plant material, its origin (country of origin, first receiving garden, „donor“ of the plant material, year of collection) as well as the acquisition and transfer conditions in a comprehensible manner.
3. In the event that scientific publications are produced based on the supplied plant material, the recipient is obliged to indicate the origin of the material (the supplying garden and if known the country of origin) and to send these publications to the garden and to the country of origin without request.
4. On request, the garden will forward relevant information on the transfer of the plant material to the body charged with implementing the CBD.
5. The recipient may transfer the received plant material to third parties only under these terms and conditions and must document the transfer in a suitable manner (e.g. by using the documentation form).

I accept the above conditions.

Date, Signature Recipient's name and address, stamp
