Gioconda *O.G.M. free*

Petunia Multiflora F1

Petunia Gioconda is completely new type of petunia. After many years of breeding, we produced the most versatile Petunia. This variety is ideally suited for all existing types of production and uses in the garden. However with the remarkable ability to adapt to a wide range of temperatures from as low as minus 5C to 40C and continue to grow at low temperatures. Flowering continuously from early spring to late autumn. As a plug and pack plant the uniqueness of Gioconda can be seen. Ideally adapted to all garden uses - pot, container, hanging basket or open ground, branching habit which produces an amazing number of flowers. More tolerance to Botrytis then seen in existing Petunia's.

Garden Beauty

Primula Polyanthus F1

A hardy f1 hybrid series for outside plantings. Very free flowering in springtime.

Primula Acaulis F1 Rossella

A mid season Primrose with flowers formed exquisitely into miniature rosebuds that sit above the foliage. The habit is compact and the leaves neat and dark green. Available in a range of clear standard colours, Rosebud is perfect for premium pot sales where it retains its flower form at higher temperatures.

Leonardo

Primula Acaulis F1

Medium to large flowers on dark compact green foliage especially selected for the late markets. Available as a formula mix and separate colors.

Juliet

Primula Malacoides

The first semi-double flowered mixture available

Salvia Splendens **Magic**

A very early compact strain of salvia. The plants have dark foliage and strong spikes. This series has good weather tolerance and is excellent for packs and pots. Full six mixed colours.

Salvia Splendens **Pharaoh**

Pharaoh is the first salvia series on the market with striped flowers in a full range of colours. Great heat tolerance and weather resistance. Medium early, compact and with dark foliage.

Gazania F1 **Solero**

Huge flowers displayed on thick beefy on strong stems plants on the market. The mix contains both clear and dark eyed colors. Makes great pots, baskets and containers. Pot size:12-14 cm Habit: Upright Crop time afterpotting:

Riviera

Vinca F1

Vinca f1 "Riviera" was bred to stand the summer heat as well as the cool spring. This series is early in the pack and has outstanding garden performance. Available in an exciting range of bright colour.

Red Magic

Tomato F1

This variety was selected and produced in the Agro Sarnese after years of research, all while maintaining the organoleptic properties of the San Marzano tomato: taste, color, pH, tolerance to water stress and high temperatures.

Indeterminate plant
Residue: 6.5
Shape of the fruit: elongated
Weight of the fruit: ca. 80 gr

Faraoro

Tomato F1

In 1990 we had started a project to improve the genetic San Marzano tomatoes. As part of this project were obtained several improved lines of San Marzano. Very good for industrial service.

Indeterminate plant Residue: 6.5 Shape of the fruit: elongated Weight of the fruit: ca. 65 gr

Buono Peel

Tomato F1

The variety is an F1 hybrid to increase determinated, with very large and long fruits, resistant to sunburn, intensely colored when mature. For the characteristics above that variety is particularly well suited to the collection for fresh market.

Determinate plant
Residue: 6
Shape of the fruit: elongated
Weight of the fruit: ca. 70 gr

Tomato F1 Biliardino

The plant is determinate, with good vigor, good simultaneous ripening of fruit and excellent consistency. Plant with good grapes, the fruit is round (like cherry), deep red at maturity, thin skin with good organoleptic characteristics.

Determinate plant Residue: 6.5 Shape of the fruit: round Weight of the fruit: ca. 25 gr

Baby Doc

Tomato F1

Deep red color, very similar to the Sanmarzano

Determinate plant
Residue: 5.5
Shape of the fruit: elongated
Weight of the fruit: ca. 65 gr

Tomato F1

Red Arcobaleno

The variety is for the production of concentrates and grinding, good simultaneous ripening of fruit and excellent texture, suitable for mechanical harvesting. The fruit is rounded, deep red at maturity, with a thin skin, thick pulp of good and intense color at maturity, with excellent organoleptic characteristics.

Determinate plant Residue: 5.5 Shape of the fruit: oval
Weight of the fruit: ca. 55 gr

Allegra
